HOMELAND INTEGRATED OFFSHORE SERVICES LIMITED

RC 652631

Homeland Integrated Offshore Services Limited has always displayed its exceptional skill and standard at every project engagement. We understand that tailor-made concepts ensure the best in quality and flexibility to serve various markets and clients, and so we strive to deliver products and services that exceed client expectations with a service model that stretches beyond our present paradigm.

Our priority has always been, and still is, the well-being of our clients, and that requires that we have the business foresight as well as strong and practical capabilities in the field we tackle.

Our consistent engagement track record is testament not only to our focus and effectiveness in the industry but also on richly investing in our people. Our backbone remains the team of engineers and experts and their wealth of knowledge and experience in the marine and engineering business.

Besides the core area of marine services, we have continuously expanded our complement of services over the years as opportunities to attain new heights and standards presented themselves -we pursue a different philosophy.

We aspire for excellence in our performance and expect nothing less in order to ensure the success of clients' projects. Our investment strategy hinges on the quality of being reliable in all engagements.

Louis Ekere
Managing Director

Mission

Our mission is to provide a scope of versatile marine services that is valued by our customers in the Nigerian petroleum industry.

In the pursuit of our goal, we are hardworking, honest, efficient, and proactive in our services. In everything we do, we consider the safety of our employees and the marine environment.

We continually strive to improve on our achievement. We are creative and innovative in business. We are vigilant and careful on land, swamp and sea. We listen to our customers, to each other and to our suppliers.

We gauge our success by the success of our customers. Our main objective is the satisfaction of our clients and reaching the oil industry's peak with highly integrated and qualitative package of products and services.

Corporate Overview

Homeland Integrated Offshore Services Limited is a multi-disciplinary organisation for engineering construction, facility maintenance, procurement and technical manpower development, equipment leasing, provision of cranes and special vehicles as well as marine logistics.

The company was incorporated under the laws of the Federal Republic of Nigeria in year 2006. The company is wholly Nigerian-owned.

During the years, the company has grown to become a leading name in swamp marine operations in the oil and gas industry. The company has successfully built and deployed owned assets for marine, swamp and land operations including houseboats, tugboats, barges and cranes.

Presently, the company is focusing on offshore marine operations having successfully operated in the downstream swamp, creeks and land, as

we aspire to be the leading marine logistics provider in the Nigerian petroleum industry.

Homeland Integrated Offshore Services Limited is professionally managed and has developed a cadre of employees who are well-trained and motivated. The company prides itself on its on-time service delivery and efficiency. The company has also nurtured and built up goodwill in the Nigerian petroleum industry and host communities of its locations.

We are a company with a "Can Do" attitude in our engagements. This is what sets us apart and enable us to provide excellent service and equipment at a competitive rate. In addition to our service and equipment, our employees are go-getters. We have the skills that support what we do adequately.

Competencies

- ✓ Heavy-Duty Equipment Supply
- ✓ Logistics Services
- ✓ Manpower Provision
- ✓ Marine Support Services
- ✓ Oil & Gas Services
- ✓ Special Vehicle Transportation

With a growing focus on differentiated marine and offshore solutions, Homeland Integrated Offshore Services Limited delivers efficient products and services as well as expert advice to clients. The goal is to adequately meet the needs of our clients to enable them effectively reach their goals.

At Homeland Integrated Offshore Services Limited, the emphasis is on flexibility and responsiveness to project requirements rather than a rigid organisational structure.

Our interest lies in meeting client needs in executing swamp, creek, land and marine logistics projects with our capabilities and wealth of experience as well as maximize indigenous participation in order to better package more commercially attractive offers.

Our capabilities and projections in this presentation details the organisation's experience and potential in executing swamp, creek, land and marine logistics projects.

Today the challenge for offshore and onshore industrial development demands new approaches by operators, contractors and suppliers alike. This we believe requires competence, technicals resources and commitment to meet these new challenges and through a synergy of efforts by combining our local capacity with recognised and reputable foreign technical partners to offer new technology to the Nigerian oil and gas industry today and in the future.

We have reached our ultimate goal of delivering services and products to our clients on schedule without compromising health, safety and security of personnel and communities within our area of operation as well as the environment in general.

We offer these services on land, swamp and offshore terrains. Homeland Integrated Offshore Services Limited strives to perform its services to the highest quality standards obtainable in the oil & gas industry and in accordance with the tenets of ASME, AWS, BS, DIN codes.

Operations Overview Infographics 2013

Services Overview

Our extensive experience in welding and fabrication is unequalled. We undertake fabrication of spools and pipelines, mechanical and structural fabrications, barges, crude oil/product storage tanks. Our fabrication is in conformity with ASME B31.4 code as well as other internationally accepted standards and codes.

We have proven our strength in the area of pipeline and flow-line leak repairs and clamping services, on land, swamp, canals and river crossing.

Construction Services

Construction and Fabrication

- Production and export facility construction
- Plant works and manifolds
- Barges and houseboats construction
- Tank refurbishing and construction (onshore and offshore)
- Pipeline & trunk line construction
- Construction of bund walls, drain-ages, light bridges and earthen silos
- Steel construction services
- Platform refurbishment, upgrade & maintenance

Civil, Structural and Earthwork Construction

- Onshore and offshore building design and construction
- Equipment foundations, platform design/extension and access ways
- Pipe supports
- 3D modelling (platforms, foundations, access ways, etc)
- Platforms and miscellaneous structural integrity
- Proficiency in Staad-Pro PDMS and AutoCAD
- Offshore facilities reinforcement design for slot additions

Equipment Supply & Leasing Services

Homeland Integrated Offshore Services Limited has a variety of marine equipment for offshore oil exploration, production and logistics support currently on lease to multinational companies and oil servicing companies in the Niger-Delta of Nigeria.

Houseboats

Homeland Integrated Offshore Services Limited has fleets of houseboats for offshore oil exploration and production support services. Currently deployed with Shell Nigeria Limited and Chevron Nigeria Limited are the 100 Man Houseboat, 60 man Houseboat and 30 Man Houseboat.

We are committed to providing and maintaining a safe working environment for the health and safety of employees, clients and the general public.

Mechanical Services

- Maintenance and overhaul of heavy-duty machines
- Installation and maintenance of turbines and pumps
- Installation, maintenance and upgrade of surge vessels, valves and valve platforms
- Installation & maintenance of booster sand shipping pumps
- Flow station upgrade & maintenance
- Calibration of equipment

Management and Consultancy Services

- Provision of skilled, unskilled and recruitment of Professional personnel in all fields of Engineering and Management Science
- Deployment and redeployment of personnel

Marine Logistics Services

Homeland Integrated Offshore Services Limited maintains a variety of construction barges that are available on the Niger-Delta waterways. We also have barges and equipments such as cranes for hauling contractors. We have an inland crane barge fitted with 80" x 36" spuds which can easily support a large crane or can be utilized as a conveyor loading platform. We also stock an assortment of sectional barges Flexfloats Poseidon and Rendrags. We carry different sizes and are continuously upgrading.

Marine Offshore Support Services

Homeland Integrated Offshore Services Limited have tugboats in Port Harcourt, Rivers state available for offshore towing and contract leasing. These tugboats are maintained to the highest standards and undergo annual inspection by the Nigerian Waterways operators to ensure that our policies and safety procedures are adhered to.

We take great pride in constantly upgrading our equipment to meet the challenging needs of our customers.

Marine or Special Transportation Services

Services spans across rig move and deployment logistics, marine vessels supply and operations, offshore support services including air transportation and road haulage.

Pipeline and Production Services

- Pipeline integrity program
- Corrosion Surveys, Design and Installation of Cathodic Protection System
- Corrosion Monitoring Programs
- Pipeline Pigging Services
- Pipeline Coating Survey and Rehabilitation
- Third (3rd) party inspection services
- Non-Destructive Test (NDT) Services, QA/QC Services
- Plant and Tank Cleaning
- Pipeline and Storage Tank Maintenance
- Sandblasting and Painting inspection
- **Pipeline De-oiling/De-watering:** As part of our services, Homeland undertakes de-oiling and de-watering of oil and gas pipeline respectively. We use various pigging vehicles, chemical/gels and inhibitor (anti-corrosion fluid) in the course

of de-watering. We also deploy high capacity air compressors de-water the line prior to nitrogen purging/injection of pipeline.

- **Pipeline Leak Repairs/Clamping:** We utilize specialized equipments, tools and cofferdam technology to offer quick and adequate response to our clients' needs in arresting the leak from flow stations and pipeline. Following the result of our quick intervention, we help curtail associated environmental hazards and pollution. Our ability to communicate with the impacted community using our tested methods has given us unequal result in the area of work in the Niger Delta of Nigeria. We have proven our strength in the area of pipeline and flow-line leak repairs and clamping services, on land, swamp, canals and river crossing.

Project Management Services

- Project planning and scheduling
- Progress measurement
- Document controls
- Quality assurance and quality control
- Proficiency in MS Project and Primavera

Organisational Structure

Homeland Integrated Offshore Services Limited enjoys the services of qualified engineering and management personnel in every area of her specialization. Our personnel and engineers of all specialties are graduates from engineering universities and institutions of related fields. They have undergone the required training and are capable of operating various advanced scientific programmes.
